504 Victoria Road
Ryde
New South Wales**

**This seminar is also being held in Liverpool on the 17th & 18th April.
Please see website for details.**

Program

International epidemiological data suggests that 40% of the population will suffer from neck pain within any given year with a re-occurrence of 60% after the first episode.

Neck pain is a multifaceted disorder that requires an understanding of anatomical, biomechanical and neural structures.

Therefore this workshop will aim to educate the clinician not only in the anatomy and functional aspects, but also the various associated disorders of the cervical spine and its contribution to the head, jaw, shoulder girdle and arm pain.

Day One hands on component will focus on examination skills, posture and conservative Soft-Tissue management of the cervical spine and associated structures. This will include the jaw and chronic whiplash associated disorders.

Day Two will focus on some cervicobrachial disorders that include neural tension via muscular and soft tissue pathways. Also some common overuse disorders such as tennis and golfers elbow. The increasing incidence of neck pain is now starting to rival low back pain as an economic cost to industry and the workplace. Therefore this workshop is an exciting opportunity to develop your skills and therapeutic strategies in managing both *neck and arm* dysfunctions.

Please bring along your massage table

Speakers

Allan Hudson

Allan Hudson has been involved in natural therapies for over 30 years. Allan has DRM, an Advanced Diploma of Naturopathy, Diploma of Nutrition, and Diploma of Acupuncture.

Allan has studied in the bodywork and Lymphatic Drainage in USA, UK, Germany, Switzerland and China. He currently is Faculty Head of Tactile Therapies and the School of Continuing Education at Nature Care College, Head of Massage for ATMS and a member of the ATMS board.
